IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

Detailed Action

In response to the Office Action mailed on 03/02/09, applicants' filed a response on 08/31/09 with claim amendments. Said response, amended claims 42, 53, 60 and 61. Thus, claims 42-57, 59-64, 66 and 67 are pending and are being considered for examination.

Applicants' arguments and amendments to claims filed on 08/31/09 have been fully considered and are deemed to be persuasive to overcome the rejections previously applied. Rejections and/or objections not reiterated from previous office action are hereby withdrawn.

The Terminal disclaimer filed on 04/16/08 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of previously awarded patents: US Patent No.: 5,650,554; 5,948,682; 6,288,304 and 6,753,167 has been reviewed and is accepted. The Terminal disclaimer has been recorded.

Claims 42-50, 56, 57, 59-61, 63, 64, 66 and 67 are allowable. The restriction requirement on 06/12/07 for species election, as set forth in the Office action mailed on 06/12/07, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** In view of the above noted withdrawal of the restriction requirement, claims 51-55 and 62 have been rejoined. Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory

Art Unit: 1652

and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Examiner Amendment

An Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it must be submitted no later than the payment of the issue fee.

Authorization for this Examiner's amendment was given in a telephone interview with Micheline Gravelle on 09/29/09.

The application has been amended as follows:

In the Claims

Claim 53: Line 14, delete "encoding the oil body" and replace with "encoding the oleosin or caleosin protein"

Claim 56: Line 3, delete "interleuken" and replace with "interleukin"

Allowable Subject Matter

Claims 42-57, 59-64, 66 and 67 are allowed.

The following is an examiner's statement of reasons for allowance:

The only prior art is the disclosure by Qu et al., (J. Biol. Chem., 1990, Vol. 265 (4); 2238-2243), teaching the isolation of a cDNA encoding a polypeptide annotated as Oleosin an "oil body" protein from maize, however, said reference neither suggests nor teaches said oil body protein as a fusion-protein in a method for the expression and isolation of heterologous proteins of interest as taught by the instant invention.

Art Unit: 1652

Furthermore, the proposed model of said oil body protein (see Fig. 6, page 2239) in said reference was incorrect, as both the amino and carboxy terminus were predicted to be buried in the lipid-bilayer of said oil body in the speculative proposed structure and therefore would not have been obvious to a skilled artisan that said oil body from said reference would be amenable for use as a fusion-protein in a method for the expression and isolation of heterologous proteins that requires fusing the heterologous protein of interest to either the amino or the carboxy terminus of oil body protein through a cleavable linker.

Following a diligent search, it was determined that the prior art neither teaches nor suggests a method for expression of heterologous polypeptide by a host cell said method comprising: a) introducing into a host cell a chimeric nucleic acid sequence comprising: 1) a first nucleic acid capable of regulating transcription in said host cell of 2) a second nucleic acid sequence, wherein said sequence encodes a fusion polypeptide and comprises (i) a nucleic acid sequence encoding at least the N-terminal domain and hydrophobic domain of an oil body protein to provide targeting of the fusion polypeptide to a lipid phase linked in reading frame to (ii) a nucleic acid sequence encoding the heterologous polypeptide; and 3) a third nucleic acid sequence encoding a termination region functional in the host cell; and b) growing said host cell to produce the fusion polypeptide. The utility of said method of production of fusion polypeptides is credible based on expression of a chimeric nucleic acid sequence encoding a fusion polypeptide comprising the full length oil body protein oleosin (polynucleotide of SEQ ID NO: 1 encoding the polypeptide of SEQ ID NO: 2 or polynucleotide of SEQ ID NO: 4

Art Unit: 1652

encoding a polypeptide of SEQ ID NO: 5) or the full length oil body protein caleosin encoding polynucleotide (SEQ ID NO: 34 or SEQ ID NO: 35) comprising a cleavable linker and a heterologous polypeptide and to a method of producing said chimeric fusion polypeptide in a host cell. Said method of expression of heterologous polypeptide by a host cell has real-world utility and permits the use of said method for the production of any polypeptide of interest in large quantities in host cells especially in transgenic plants and ease of isolation of said expressed polypeptide of interest from the host cell.

Any comments considered necessary by applicant must be submitted no later than the payment of issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".

Final Comments

To insure that each document is properly filed in the electronic file wrapper, it is requested that each of amendments to the specification, amendments to the claims, Applicants' remarks, requests for extension of time, and any other distinct papers be submitted on separate pages.

It is also requested that Applicants identify support, within the original application, for any amendments to the claims and specification.
